This listing of claims will replace all prior versions, and listings, of claims in the application.

LISTING OF CLAIMS

1. (Currently Amended) Method for creating a list of contents in a controlling device connected to a domestic network to which are connected a number of devices, ~~each supplying contents, wherein it comprises:~~ the method comprising:
 ~~[[-]] sending over the network, from the controlling device, a command specifying a filtering criterion[[.]];~~
 ~~[[-]] creating in each a device a local list on receipt of this the command, each the local list itemizing the contents supplied by the device in which it the local list is created and involved in the filtering criterion specified by the command[[.]];~~
 sending a notification to the controlling device upon creation of the local list by the device;
 ~~[[-]] transferring via the network each the local list from the device in which it is created to the controlling device upon receipt by the device of a transfer request;[[.]] and~~
 ~~[[-]] assembling in the controlling device the local lists received from the network to form the list of contents.~~
2. (Cancelled).
3. (Previously Presented) Method according to Claim 2, wherein the controlling device sends transfer requests to each connected device following a specific action on the part of the user.
4. (Currently Amended) Method according to Claim 2, wherein each transfer request is sent from the controlling device on receipt of ~~the~~ a corresponding notification.

Serial No. 10/540,149

PF030020

5. (Currently Amended) Method according to Claim 4, ~~consisting in further~~ comprising creating the list of contents in the controlling device by assembling the local lists dynamically as ~~they~~ the local lists are received.
6. (Currently Amended) Method according to Claim 1, consisting in sending a single command to all the network without specifying recipient devices, each device receiving the command deciding whether to respond ~~to it~~.
7. (Currently Amended) Device connected to a domestic network, and designed to supply contents, wherein ~~it~~ the device comprises programmed means for:
creating a local list on receipt of a command specifying a filtering criterion, ~~this~~ the local list itemizing the contents supplied in the device and involved in the filtering criterion specified by the command[[.]];
sending a notification of creation of the local list; and for
transferring via the network ~~this~~ the local list to another device connected to the network upon receipt of a transfer request.
8. (Currently Amended) Device connected to a domestic network, and designed to display a list of contents, wherein ~~it~~ the device comprises programmed means for:
sending over the network a command specifying a filtering criterion[[.]];
~~and for~~
receiving a notification that a local list is created in a responding device;
transmitting a transfer request to the responding device; and
transferring via the network a the local list from ~~another~~ the responding device connected to the network, ~~this~~ the local list ~~having been~~ created in response to the command.
9. (Currently Amended) Device connected to a domestic network, designed to supply contents and display a list of contents, wherein ~~it~~ the device comprises programmed means for:

Serial No. 10/540,149

PF030020

creating a the local list on receipt of a command specifying a filtering criterion, ~~this~~ the local list itemizing the contents supplied in the device and involved in the filtering criterion specified by the command[[,]]; ~~and for~~

transmitting a notification that the local list is created;

receiving a transfer request from a requesting device; and

transferring via the network ~~this~~ the local list to ~~another~~ the requesting device connected to the network[[,]]; and
programmed means for:

sending over the network a command specifying a filtering criterion[[,]]; and for

transferring via the network a another local list from another device connected to the network.
